

....As you know we live in Vic Falls, with our family, and can assure you that any guests you send to us will be taken care of and they will be completely safe! With the recent change in politics and the introduction of our unity government, the inflation in the country is no longer rampant, and in fact we are now experiencing 'deflation'! Things are slowly improving, and the general moral is one of hope and expectation!

In Hwange National Park, last year we rebuilt Little Makalolo, and have had rave reviews from guests. The quality of gameviewing is excellent, and our team there are doing a wonderful job!

We remain committed to the country and its people, and assure you that your clients need not worry about any risk to their health or personal safety whilst in Victoria Falls and Hwange....
